No problem Rob. I am always glad to help in an effort to make sure congressional staff are getting the information they need about our programs rather than getting suspect information from other sources.

Hi Terry and Randy -

Thank you for your quick assistance yesterday on the response to Virginia Loranger, Senator Tester's Regional Field Director, regarding Columbia Falls Aluminum near Columbia Falls, MT. I am forwarding the response sent late yesterday to Virginia as well as the original recipients of Virginia's email, including Tracy Stone-Manning, Governor Bullock's Chief of Staff. The State remains supportive of NPL listing.

As you can see below, we restated the site is eligible for the NPL and discussed next steps. For additional summary information, I provided links to the NPL site narrative and a regional site specific website which provides pertinent public information including EPA's reports. This information has been available to the public throughout the comment period.

Please feel free to contact me if you have any questions.

Thank you,  
Rob

Subject: RE: CFAC presentation to Montana West Economic Development

Hi Virginia,

Thank you for sending a copy of these talking points created by CFAC for the Montana West Economic Development Board of Directors. I'm sorry to not get back to you sooner on this issue.

Based on the environmental data collected from the CFAC site, the EPA believes the site is eligible for the National Priorities List (NPL). The environmental data provided the basis to propose the site to the NPL. The EPA will respond to all comments that we receive regarding the proposed NPL listing, including any comments submitted to the EPA by a potentially responsible party.

If you're seeking summary level information on the EPA's analytical results and potential risks to the nearby groundwater users and the nearby environment, please see either:  
EPA's website for the CFAC site: <http://www2.epa.gov/region8/columbia-falls-aluminum-reduction-plant>  
Or EPA's NPL Site Narrative: <http://www.epa.gov/superfund/sites/npl/nar1904.htm>

The EPA expects to notify the potentially responsible parties of their potential superfund liability soon. We are hopeful that the potentially responsible parties will reach agreement with the EPA to complete a full Remedial Investigation and Feasibility Study under a legally binding agreement and EPA oversight.

Thanks again Virginia,  
Rob

Tracy and Rob,

I have been forwarded a copy of a presentation made to the Montana West Economic Development Board of Directors asking them to not support a national priority listing for CFAC. Haley Beaudry and Steve Wright (CFAC employees) made the presentation.

I would appreciate your insight on their comments. At a recent meeting they organized called the Community Liaison Panel, Cheryl Driscoll, Glencore executive stated "CFAC is responsible for the cleanup and Glencore is here to help."
